

Technology: Support with basic research

I am in a bottleneck with my research project. Who can help me?

TEMAS supports their customers with the testing, planning and implementation of projects with technology background and high innovation structure.

Either TEMAS AG has its own resources to support you with your project challenges, or we are able to find the appropriate and project-specific resources

The resource procurement's goal is to find the appropriate resources for each technological questionnaire, which is carried out either under your direction or through us.

The TEMAS resource procurement allows our customer to obtain the right resources for a specific target-oriented purpose. This entails for the following steps:

- In the first step, the resource needs will be determined together with the customer for the resource procurement. For that, search fields will be used.
- The second step includes either a resource offer from the TEMA staffing pool or an external resource search.
- The third step of the resource evaluation includes an assessment with recommendation from TEMAS.
- The fourth step entails the actual resource procurement and the support for your project.

Through this step-by-step and transparent process, it will be ensured that the right resources will be found, together with the customer!!

These resources will either be provided by the TEMAS staffing pool or be found within the TEMAS wide-spanned network: The network comprises of personal contacts for basic and applied research, product and process development, analysis, regulatory affairs and more in various institutions (colleges, research institutions, industry, service provider, public agencies etc.).

What does TEMAS resource procurement bring?

The TEMAS resource procurement:

- Closes knowledge and resource gaps of your projects. Let it be work force, knowhow, methods or processes
- Finds new technological cooperating partners and with that develops company-external knowledge and knowhow
- Simplifies the access to external services, methods, instruments/devices and systems/processes
- Helps with the usage of so far unused intellectual property rights or dormant technologies.

We would like to give you more information. [Can we reach out to you?](#)

Or do you want to contact us? Then Dr. Blanca Suarez-Merino is available to you:
