

Prospects: Company looking for a technology and operation base in Switzerland

Services for overseas companies

A neutral and focused service

The TEMAS technology oriented services are focused on technological competences in the sectors Nanotechnology, Mechatronics, MedTech and Biotechnology. We assist companies to establish a technology and enterprise base in Switzerland and the European Community. Our neutral and technology oriented analysis provides companies with a detailed examination of technological enterprise clusters in regions as well as networks of competences.

The analysis

Our evaluation is neutral, technology oriented and provides you with a sound basis for your evaluation process:

- Cluster of technological competences
- Regional grouping of activities
- Human resources with specific competences
- Reputation and image of locations, rating between different locations
- National and regional innovation systems to support High-tech enterprises

Get a second opinion which supports your decision making process!
