

Prospects: Technology looking for companies in Switzerland

Services for overseas technology providers

A neutral and focused service

The TEMAS technology oriented services are at your hand in the search and analysis of technology acquiring companies. With a focus on specific competences in the sectors Nanotechnology, Mechatronics, MedTech and Biotechnology we support technology providers in the search for companies in Switzerland and the European Community to harvest value added from their set of technologies.

The analysis

Our evaluation is neutral, technology oriented and provides you with a sound basis for your decision process:

- Identification of interested business sectors and companies
- Establish company profiles and a best fit with your technologies
- Support the technology transfer
